

I am writing this message to state that I have had success at stopping nearly all of my unwanted phone interruptions,I am experiencing near zero of the solicitation call that I used to receive.

I think this law is important for elderly people because they are among the most vulnerable to these pitch phone calls that intruded on their safe and secure environments.

Federal bodies should stay out of the State Laws that protect the very people of that state who voted to have these laws.

FCC should govern Federal laws and stay out of STATE Business!!
